Front End / Full Stack Developer with 6 years of experience building web and mobile applications for fintech, banking and CRM products with React, TypeScript, JavaScript, Next.js and Ruby. Experienced in modernizing legacy code (React class components to Hooks), micro frontend architectures (Single SPA), migrating React applications into monolithic platforms, and building with in-house design systems and private npm component libraries. Uses AI-assisted development daily to speed up refactoring, migrations and feature delivery while keeping code quality high. Works in Scrum teams with UX, backend and product. Passionate about continuous learning, analyzing problems and contributing ideas.

PROFESSIONAL EXPERIENCE

N5 Now
Front End / Full Stack Developer *Jun 2023–Sep 2026*

Boost Team – "Mis Resultados" Migration (Full Stack)

- Migrated the "Mis Resultados" (My Results) project from a standalone React application into the company's monolith built with React and Ruby.
- Worked as a Full Stack Developer, building front end features in React and back end logic in Ruby, and integrating both layers within the monolith.
- Built the user interface with the company's proprietary design system to keep the experience consistent across products.
- Used AI-assisted development to analyze the existing code, plan the migration and speed up delivery.

CRM – Baseline Product

- Modernized legacy CRM code by refactoring React class components into functional components with Hooks, improving readability and maintainability.
- Rebuilt features with the company's own npm component library and moved modules to a micro frontend architecture (Single SPA).
- Used AI-assisted development tools to understand, refactor and migrate legacy code faster and more reliably.

Goals Project

- Developed features in micro frontends with TypeScript, React.js, React Query, Zustand, Single SPA and React Hook Form, connecting them to back end services and following the UX team's designs.
- Built banking information management features: charts and data visualization, user data, rankings, sales creation, sales rules, and periodic, monthly and quarterly configuration.

e-volution
Front End Developer *Jan 2023–May 2023*

Lendingpoint Project

- Implemented React Storybook for component documentation in projects built with React, React Native and Webpack, including monorepos using these technologies.

LeanCore
Front End Developer *Nov 2020–Jan 2023*

Client & Admin Dashboard – Financial administration

- Developed a dashboard to manage products, credits, transactions, customer profiles, statistical reports, document signing, document upload and download, biometric verification and OTP flows.
- Used React Hooks, Next.js, Redux Toolkit, MUI, TypeScript, SCSS and Jest.

LeanCore Web – Financial administration

- Developed a responsive web application presenting the company's services and how to acquire them, using Next.js, TypeScript and SCSS.

Zone P – Parking management

- Built from scratch a mobile application for iOS and Android with React Native, Expo, Firebase and Android Studio to manage vehicle parking.
- Developed vehicle entry and exit, staff and shift records, license plate records, times and charges.
- Built a React dashboard to view, download and edit the data collected by the app.

EDUCATION

POLITÉCNICO GRANCOLOMBIANO — **Medellín, Colombia**
Software Engineering — *2024 – Present*

DIGITAL HOUSE — **Medellín, Colombia**
Certified Tech Developer — *2012 – 2023*

NATIONAL UNIVERSITY OF COLOMBIA — **Medellín, Colombia**
Mining and Metallurgy Engineering — *2014 – 2020*

SKILLS

Programming languages: JavaScript, TypeScript, Ruby, HTML5, CSS3, SCSS

Frameworks & Libraries: React, React Hooks, React Native, Next.js, Redux Toolkit, Zustand, React Query, React Hook Form, MUI, Storybook, Expo, Jest

Architecture & Practices: Micro Frontends (Single SPA), Monolith Migration, Legacy Code Modernization, Design Systems, Component Libraries (private npm packages), REST API Integration, Responsive Design

AI-Assisted Development: AI coding assistants for code generation, refactoring, legacy code analysis and migrations

Tools & Version control: Git, GitHub, GitLab, Bitbucket, Webpack, Firebase

Agile methodologies: Scrum

Soft skills: Continuous learning, Problem solving, Teamwork, Flexibility, Proactivity

Languages: Spanish (Native) · English (C2, EF SET – cert.efset.org/en/UGKiNQ)
